

KARRI VEERA VENKATA ABHISHEK REDDY

abhishekreddyk05@gmail.com +91 8341358888 [LinkedIn](#) [Github](#)

EDUCATION

National Institute of Technology, Durgapur
B.Tech in Electronics and Communication Engineering

NOV 2022 – JUNE 2026
Honors: 6.9 CGPA

PROFESSIONAL SUMMARY

Detail-oriented **AI/ML Engineer** with a solid foundation in Python, deep learning frameworks (PyTorch, TensorFlow), and Generative AI architectures. Proven experience in developing Retrieval-Augmented Generation (RAG) pipelines, modeling data, and building scalable full-stack applications. Strong grasp of automated testing and software engineering practices, seeking to drive innovation at Sequelstring Solutions.

SKILLS

- **AI & Machine Learning:** LLMs, RAG, Retrieval-Augmented Generation, PyTorch, TensorFlow, Scikit-learn, Vector Databases (FAISS, ChromaDB), Prompt Engineering.
- **Programming & Tools:** Python, JavaScript, SQL, C++, Git, Docker, REST APIs.
- **Data Processing & EDA:** Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering.
- **Web & Frameworks:** Node.js, Express, React, FastAPI, Flask.
- **Testing & Automation:** Automation Testing, Unit Testing (PyTest), Integration Testing.

PROFESSIONAL EXPERIENCE

Machine Learning Intern at Future Netwings

[Certificate](#)

- Developed a machine learning model to classify fake and genuine news articles using supervised learning algorithms.
- Applied NLP preprocessing techniques including tokenization, stop-word removal, stemming, and TF-IDF vectorization.
- Built the complete ML pipeline covering data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation.
- Achieved **94% accuracy** and an **F1-score of 0.92** across a dataset of 10,000+ news articles Python, Scikit-learn, Pandas, NumPy, and NLTK.

PROJECTS

Automated AI Quiz Generator & RAG Testing Framework

[Github](#)

- Built an AI-powered quiz generation system using Python, LangChain, Retrieval-Augmented Generation (RAG), and Google Gemini API to generate context-aware sports quizzes.
- Implemented ChromaDB vector database for semantic retrieval and integrated a DuckDuckGo Web Search fallback agent to improve answer accuracy and reduce hallucinations.
- Developed structured prompt pipelines to generate multiple-choice quizzes with explanations based on retrieved knowledge.
- Deployed the application on Streamlite Cloud with secure environment variables and secrets management.
- Technologies: Python, LangChain, Google Gemini API, ChromaDB, RAG, Streamlit, Git, Prompt Engineering

AI Hiring Copilot – Agentic Recruitment Assistant

- Designed six AI agents for resume parsing, ATS scoring, candidate ranking, interview question generation, hiring summaries, and automated recruiter emails using LangGraph workflows.
- Developed multiple AI agents for resume parsing, ATS scoring, skill-gap analysis, interview question generation, and hiring recommendations.
- Implemented Retrieval-Augmented Generation (RAG) with FAISS and LLM APIs to provide context-aware candidate evaluation and document search.
- Integrated OpenAI/Gemini APIs with prompt engineering techniques to automate recruiter workflows and improve hiring efficiency.
- Designed an interactive recruiter dashboard to visualize candidate rankings, analytics, and AI-generated insights.

Leadership & Achievements

- Editor-in-Chief, Indian Society for Technical Education (ISTE) Club, NIT Durgapur — created promotional and event videos for technical and cultural activities.
- Secured All India Rank (AIR) 2154 in JEE Mains 2022 among ~1 Million candidates.
